ST-70

The ST-70 has been designed for the hostile hospitality and retail markets. There is no need for any cooling fans. This provides silent operation so the only sound to be heard is the sound of the customers. Combine this with Toshiba TEC's legendary build quality and knowledge of the market place and the result is an ideal POS device for any environment.

Leading the way through Quality and Innovation

High reliability

The touch screen and front panel are sealed together for a spill-proof design. The machine does not need vent holes, therefore, no dirt or undesirable foreign objects can enter it. The ST-70 stays clean inside, providing even better reliability.

Operating System Support:
- Windows 2000®
- Windows XP®

Fast interfacing

The USB 2.0 interfaces have a maximum transmission speed of 480 Mbps, which allows the connection of peripherals that require high-speed transmission. The optional PCMCIA card bus is a fast, 32-bit bus.

Easy maintenance

The hard disk is accessible by the side cover. Replacement takes only seconds. The external interfaces are located at the front of the machine, which makes it easy to connect and disconnect peripherals.

More improvements

The new super bright TFT screen with its wider viewing angle makes operation quicker and more comfortable. Also, there is increased functionality with the introduction of two powered serial ports. This means that peripherals are less susceptible to misuse or failure.
